

CABLE TIES Data Sheet

Our range of cable ties are manufactured from high grade Nylon 6.6 giving strength and flexibility. Manufactured in lengths from 80mm up to 1030mm they are suitable for many applications, servicing the electronics, heavy electrical and engineering industries. Whilst these cable ties have many uses they should not be confused with the Acme security seal range of products which are designed with tamper evident technology and one time use.

Technical Data

Recommended Applications

Electronics Industry, Light & Heavy Electrical and Mechanical Engineering Industry

Material

High grade Nylon 6.6

Flame Resistance

In accordance with UL94V2

Temperature Range

For continuous use -40°C to +85°C

Available Operating Lengths

80mm -1030mm

Average Breaking Strength

8kg - 113kg

Marking

Text and serial numbering is an available option

Colours

Red, Blue, Green, Yellow, Black and Natural.

Packaging

Standard Packaging : Below 200mm - 100pcs or 1000pcs/bag
: Above 200mm - 100pcs/bag
