

M SEAL Data Sheet

The Acme **M Seal** is a pull tight seal manufactured from Polypropylene material. The locking action is very similar to the tried and tested Minitight but has the contours of the smooth X Seal. The design offers a cost effective solution for applications where strength is not the primary requirement, but is ideal for use as an indicative seal.

Technical Data

Recommended Applications

Airlines, Refineries, Warehouses, Cash bags,
Postbags, Mailrooms, Bar boxes, Fire doors, Lockers.

Material

Polypropylene

Available Operating Length

(L1) 17.6cm (overall 23cm)
